

# Incognito Invisible Braces

PERFECT SMILES ORTHODONTICS

## What are Incognito Braces?

Incognito™ Orthodontic Braces are placed on the back side of your teeth, so they are completely hidden from view. No one will know that you are wearing braces unless you tell them.

The word lingual refers to the tooth surface next to your tongue, and that's where Incognito Hidden Braces are placed. They are the only behind-the-teeth braces that are 100% customized to the shape of your teeth and to your individual orthodontic treatment.

## Customisation makes the difference

Incognito Orthodontic Braces are made one patient at a time, one tooth at a time. They are 100% customized to follow the contours of your teeth for comfort and performance. We build your unique prescription, determined by your doctor, into your Incognito Orthodontic Braces so your teeth will move in the most efficient manner possible. Our wires are bent to a precise shape with robotic technology to ensure that you get the results you want.

## Why choose Incognito Braces?

- Completely aesthetic, no one will know that you are wearing braces
- Minimal discomfort and speech interference
- 100% customized for the best results
- Customized wires that do not require adjustments often mean fewer appointments and less discomfort throughout treatment
- You will see results quickly

## Who can wear Incognito Braces?

Incognito Orthodontic Braces are a good treatment option for most adults and adolescents who have all of their permanent teeth.

## Frequently Asked Questions

How are Incognito™ Orthodontic Braces different from other types of braces?

	Incognito Braces	Aligners	Clear braces
